SOUTH AFRICA today began registering voters for multiracial elections in South West Africa (Namibia) due to lead to

Africa (Namibia) due to lead to independence at the year's end. At the same time, South African Foreign Affairs spokesman Brand Fourie reaffirmed his government's support for the independence plan drawn up by five western countries. He denied that registration of voters meant his country was proceeding with its own solution in the territory. "There is no suggestion at this point of us going ahead unilaterally." Mr. Fourie, Secretary for Foreign Affairs, told a South African television interviewer. Registration of the estimated 40,000 voters in the sprawling, under-populated territory which South Africa has administered since 1945 is due to last three months. After that, at a date yet to be announced, they will elect a constituent assembly which will draw up the independence constitution.

per cent or more. Nearly half of the sample thought prices incomes in the next year, against a quarter at the begin-

ning of the year.

The survey also showed that people who expected things to get worse exceeded those who expected them to get better, and that confidence declined in the Government's ability to deal with inflation and unemployment. But at the same time people were thinking of buying houses and large amounts of consumer durables in anticipation of price rises.

The Centre concluded that "brisk consumer spendingreinforced by fear of inflation and buy-in-advance psychology should continue in the near term, but the outlook is less favourable for late 1978."

### **Demonstrators** protest against atomic reactor Ey Our Own Correspondent

NEW YORK, June 26, A CROWD of nearly 20,000 gathered at Seabrook, New Hampshire, over the weekend to protest against nuclear power. But the demonstration, which took place under the eyes of hundreds of policemen and National Guardsmen, was considerably more peaceful than last year's profest when more than a thousand people

Seubrook, a small coastal village north of Boston, has become the focus of antinucleur protest due to the 2.300 MW reactor under construction there.

This year's demonstration was an orderly affair largely because of the authorities' offer of an 18 acre site. although some protesters threatened not to leave the site at today's 3 p.m. dealine.

### NY Governor challenged by former deputy

NEW YORK, June 26. nant-Governor, Miss Mary Anne Krupsak, who left Covernor Hugh Carey's rewho left election campaign earlier this month, today declared that she will challenge the Governor numination in September.
Proclaiming herself "the

Prople's Candidate," Miss Limpsak will ensure that the Linvernor will have a far busier campaigning summer than he had planned and may well have to spend more than the \$3.5m he had scheduled for his re-election effort.

# Democratic and Popular Republic of Algeria

MINISTERE DE L'HYDRAULIQUE, DE LA MISE EN VALEUR DES TERRES ET DE LA PROTECTION DE L'ENVIRONNEMENT International Invitation for Pre-selection for the Project of Sanitation Improvement of the Town of Algiers

The Ministry of Hydraulic Engineering, I and Development and Protection of the Environment wishes to inform companies, member countries of the Banque Internationale pour la Reconstruction et le Développement (BIRD), and of Switzerland that they will undertake important works on the Oued El-Harrach reservoir in the Greater Algiers region for sanitation improvement.

The work includes the construction of: —A main sewer of approximately 7 kms for used water and rainwater along the left bank of Oued El-Harrach. Ground excavation of approximately 380,000 cu. m. and 35,500 cu. m. of concrete are planned.

A purifying station for the treatment of domestic and industrial waste waters for a population of approximately 750,000. The maximum flow of purified waters at the station will be approximately 4 cu. m./sec.

The Algerian Government has obtained a loan from Banque Internationale pour la Reconstruction et le Développement for part of the financing of this work. The Ministry of Hydraulic Engineering, Land Development and Protection of the Environment invites con-tractors in this field of activities to submit their qualifications for the realisation of the two works

mentioned above. The pre-selection files may be obtained from the Direction de l'Rydraulique, de la Mise en Valeur des Terres et de la Protection de l'Environnement de la Wilaya d'Alger — Immeuble "La Pépinlere" — R.N. 5 Cinq-Maisons — El-Harrach — Algiers — ALGERIA, as from 15th June. 1978.

Interested companies should send their dossiers to the above-mentioned address by 31st July, 1978 at the latest.

-ADVANCES TO UK RESIDENTS-

# Animal feed cartel put on register

By Our Consumer Affairs Correspondent

DETAILS OF the common pricing agreement operated by the main suppliers of animal Restrictive Practices yesterday.

The agreement, which has now been abandoned, came to light during the Price Commission's survey of the industry. Under it. six out of the seven companies examined agreed to co-ordinate some aspects of their pricing

The Commission was scathing about the level of competition in the industry in general and concluded that BUCM-Silcock was the price leader which other companies followed.

Details of the collusive agreement formed by the Commission, which was strongly criticised by the industry for its report, have been passed on to the Office of

# Quarterly analysis of bank advances

to UK residents by banks in the UK at May 17, 1978; as Table 4 in the Bank of England Quarterly Bulletin

# A single lift for m.v. 'Craftsman'

Five hundred tons is the lifting capacity of the m.v.

It is the greatest lifting capacity of any liner vessel under This vessel forms part of the Harrison Line Fleet which has a total of seven ships built and equipped for the

carriage of heavy lifts. All are available for specialised assignments, often travelling to parts of the globe off traditional liner routes to carry out a single job - such as transporting a

massive transformer. Heavy lift vessels, container ships, bulk carriers and conventional liner vessels all play an important part in the modern Harrison Line fleet.

But a shipping line is built from more than ships. Harrison people are hand picked and highly , experienced. Those on land are backed by modern aids, such as computers for the all-important

documentation. Unlike the elephant, Harrisons is not the largest of its kind.

But, with the finest ships, skilled personnel and a tradition of 125 years of caring for cargo, Harrison is one of the finest shipping lines today.

WE CARE FOR YOUR CARGO Thos & Jas. Harrison Ltd., Mersev Chambers, Liverpool L2 8UF Thos & Jas, Harrison Ltd, 15 Devonshire Sq. London EC2M 4HA

# Do you have vacancies for jung people?

You could find just the people you need through the Careers Service.

As an employer, you know the problems of recruiting young people to suit your needs. It can be timeconsuming and costly. Fortunately, professional help could be literally just around the corner. Simply call your local Careers Service office. Our staff know a good

deal about the abilities of local school leavers who are looking for jobs. In fact, we were in contact with many of them before they even left school.

With our experience and specialised skills, we can use this know ledge to identify the most suitable candidates.

Which means you only have to spend a

little time selecting from a short list. As well as saving time, you could also save money. You see, there's no

fee for this service.

Incidentally, being part of the local education authority, we can also advise you on academic standards, apprenticeship schemes, day release and other further education, as well as on Government schemes to help unemployed youngsters.

So get the help of our experienced professional staff in filling vacancies for young people. Call your local Careers Service office.

Or fill in the coupon.

Nevertheless, the efforts of to try to escape from low cost on the industry's sales over- the past year show that the UK year to more than £30m., with British Textile Employers' deficit-£23m-and this, added situation is used as a featherbed

But although, as the statistics on textile and clothing trade of

£70.51m, produced a total loss

£93m. The deterioration compared with last year was accounted for by lower clothing exports and higher textile and clothing imports. It will only become apparent as the year proceeds whether the import performance represents delivery in the first three months of a substantial part of the quota allowed to developing countries. If this is the case imports will slow down as the year proceeds. On the exports side, some recovery during the rest of this year may also come from the effective 7 per cent decline in sterling's value since

### Threat

The other threat to the industry's export performance as this year unfolds, could come from a predicted upturn in conmarket. A number of false recoveries from the recession over the past two to three years has made the industry wary of predictions of an unturn, and rejuctant as a result to commit uself to stocks. There have been warnings therefore, that the industry could yet find itself unprepared to meet

Kevan Don

Apparently it's not just tarmers that appreciate a superb tractor.

David Brown's success at exporting tractors doesn't go unnoticed.

Hence our fifth Queen's Award to industry, the only one awarded this year to an agricultural machinery manufacturer.

For the future we are currently ploughing £15 million into enlarging our research, development and manufacturing facilities. So we can build even better tractors for world markets.

Our second great investment is our workforce at our Meltham and Leigh factories. Many of them are dedicated to maintaining and expanding our second-to-none parts and service back-up.

This is how we succeed in selling 80% of our total output overseas and earning vital foreign currency for Britain.

For when it comes to tractors, what we sowed yesterday we're

reaping today.

# individual export finance service In a fast-changing international scene, it's more than likely that you could find it profitable to

review your trade financing arrangements - if only to make sure that they're as efficient as they

And when you do review them, you'll probably find that we at A P Bank can help you to a more efficient - and profitable - solution.

Not only are we specialists in international trade - we're also specialists in providing tailor-made solutions to individual problems; and in the kind of professional service that comes only when a customer is the personal responsibility of a senior manager who can make immediate decisions.

As a bank with many years' experience of international trading, we know as well as anyone that importing or exporting is never an easy job.

But if you'd like to find out how we may be able to remove some of the difficulties, please call 01-588 7575, and speal: to David Ollett or Greg Brzeskwinski, They'll be happy to help you -

Financial arrangements play an increasingly important role in export trade-particularly where the really big contracts are involved or when the buyer country belongs to the developing world. For Britain the banks function as the major source, underpinned by the Export Credits Guarantee Department.

THE MOST significant direct Government involvement in exports for some years was the part it played in the £100m power station contract which Wilcox Babcock and aneral Electric were recently awarded by Kowloon Electricity Supply Company of Hong Kong. For the first time the Depart-

nent of Industry played an ntegral part in the negotiation of such a contract, and the Prime Minister took an active interest. There is now con-jecture whether this may not et a pattern for future deals of this kind.

While it is clear that the Department of Industry's role as main negotiator came about because of the circumstances of the UK power industry, the fact that it was a negotiated rather than tendered contract and the UK's special relationship with Hong Kong, the deal clearly broke new ground. Mr. Alan Williams, Minister

of State at the Department of Industry, was in overall charge of an operation aimed at providing an attractive package of equipment and finance, and Lazards was appointed by the department to advise on finance. General Electric was apdepartment and a three-man three years. # Whitecroft down £0.75m to £4.25m

IN LINE with indications in their interim statement, the directors of Whitecroft, textiles, engineering and construction group, report taxable profits down from a peak £5m, to £4.25m, for the March 31 1978 year.

At half-way, profits were down from £2.16m to £1.78m and although directors said they expected second-half results to be substantially ahead of the first half, they added that the group would not achieve the profits for the 1976-77 year.

Stated earnings per 50p share are down from 48.4p to 35.18p and the dividend is stepped up to 13.4p (12p) the maximum permitted, 25 forecast, with a final payment of

Turnover for the period was £35.11m and excluded that of George Longden and Son, which was closed during the year. For 1976-77 turnover was £55.96m but included £6.6m from Longden. Also included in the turnover for 1977-75 was the group's share of associates turnover, with the comparative figure being restated.

There was an extraordinary debit of £0.75m for the year, represening mainly the loss on closure of Longden and includes the trading loss to the date of closure. Last time there was an extraordinary credit of £0.55m which has been restated to conform with results will produce higher earna change in accounting policy for ings and dividends.

a change in accounting policy for goodwill.

Since the end of March the group has acquired Moorlite Electrical for £3.24m cash; this company turned in pre-tax profits of £0.71m for the March 31 year.

Net tangible assets per share of Whitecroft were 225.77p (213.31p).

Mag and dividends.

As already known, pre-tax revenue rose from £1.59m to £1.57m for the year to April 30, 1978, and earnings per 25p share were better at 2.594p (2.414p). The dividend is lifted to 2.55p (2.31p) net.

During the year, the directors decided to invest more in the U.S. and to make an initial investment in Japan and to bay for this the

# THE EAST SURREY WATER COMPANY

Points from the Annual Statement for the year to 25th March 1978 by the Chairman Mr. P. D. Davey, E.C.A.

The Accounts and Charges Water charges not increased in 1977/78 tesulted in

a deficit for that year of £194,000. Consequently for 1978/79 water rate increased by 18.2% to 9.1p in the £ and meter charge by 21.9% to 72.3p per thousand gallons, even so, the water supply charge for a house with a net annual value of £300 is only around 7 p per day.

Capital Expenditure

Kenley Works reorganisation approaching completion. New service reservoir near Caterham. about to be started, estimated cost £500,000. Significant increase in expenditure on the replacement of underground mains in future years.

Equalisation of Water Charges

Domestic consumers will receive a benefit of approximately £1 per household in 1978/79, but this measure reduces financial accountability of individual authorities and companies.

General Services Charge

Collection of this charge on behalf of the Thames and Southern Water Authorities has commenced. Consumer now able to ascertain the full cost of his water supply and disposal service.

our gratitude to Continental for all the help which Metal Box has received from them over nearly half a century.

### Metal Box - Standan Inc.

Our first major project following the termination of the Continental Can agreement has been the formation jointly with Standun Inc. of Compton, Los Angeles, of a company to manufacture two-piece beverage cans at a factory to be built in the Los Angeles area. The new corporation has signed a contract to supply Pepsi-Cola Bottling Group with beverage cans.

# -Environment

It is gratifying to report that the Industry Committee for Packaging and the Environment (INCPEN) has with Government backing achieved its objective of a Voluntary Code of Practice for the Packaging Industry and the Packaging Council with responsibility for monitoring it. With our full support INCPEN has also joined with sister organisations in other EEC countries who share our concern about the prejudice being shown against packaging by the Environment and Consumer Protection Service of the EEC.

The Overseas Company, despite political problems in a number of territories, has had a reasonably good year; in particular, the glass plant in Nigeria is well established and is making good profits.

### Outlook

The prospects for the economy do not appear to favour any substantial general increase in sales this year. There are opportunities for increasing efficiency and profits, if we can overcome the industrial relations problems which affected us last year. I believe that there are signs that this is happening but until we can give incentives for greater effort, skill and responsibility, which is difficult under the pay policy, problems are bound to arise.

# PORTSMOUTH AND SUNDERLAND NEWSPAPERS. LIMITED

### SIR RICHARD STOREY'S STATEMENT

Lord Buckton

On February 17, the eve of his 82nd birthday, the Company's President, Lord Buckton, died. For over 50 years he had led and served to Company. The Board and I now publicly record our admiration and appreciation of the wise judgment, exacting standards of excellence, integrity, and personal example of energetic and inspiring work with which Samuel Storey. Lord Buckton, marked the long period of his service to the Company.

The financial results recorded in this year's report and accounts are undoubtedly good. The Company's large capital investment in the South is now beginning to earn a proper return. The present trend in advertising volume and newspaper circulation is encouraging. It is, however, salutary to note that the Company's first current cost accounting statement shows a profit before tax of £1.554,000 compared to the f1.925,000 stated on a historical basis.

New Equipment for Portsmouth

Management has continued regutiztions with the production unions to enable the most modern composing techniques available to be used at The News Centre. Portsmouth. Some of the new equipment has been installed and it is hoped that the rest will follow soon. The Board remains determined that optimum use shall be made of this machinery for the benefit of shareholders, employees. readers and advertisers; however, in order to secure agreement at this stage, it has been necessary to defer the full and proper use of the equipment New Technology in the provincial press

There has been too little pressure nationally from the leaders and members of the Newspaper Society towards negotiating the introduction into the industry of the newest composing technology—increasing use of which is now being made in many other countries. Continuing inactivity can only damage the provincial press generally and will lead newspapers, unless they can negotiate satisfactory solutions independently of the Newspaper Society, to that jungle from which some national newspapers are now so feverishly and belatedly trying to extricate themselves.

Development at Harticpool At the Mail, Hardepool, a programme of modest development has been started to improve working conditions for the staff and raise the quality of the paper so that the profit from this office may be increased.

Lack of progress in Sunderland I said in my 1976 report that the Company's develop-ment in Sunderland, where web-offset full colour printing and computerized photo composition in a new building had been introduced, would "avail the Company nothing unless all involved are now willing to concentrate on producing the finest paper possible with the new plant and premises which have been designed to use modern and premises which have been designed to use modern methods and give employees the maximum comfort and pleasure". Now, two years later. I regret I have to say that it still has not been possible for management to secure from the production unions the necessary agreement whereby anything like "the finest paper possible" may be or is produced. Not only dues this deny to the public the high quality newspaper for the production of which the Company has invested large sums of money, but it also secured, limits the work of the real of the staff who are severely limits the work of the rest of the staff who are doing their best, as is evidenced, for example, by the fact that lournalists from this office have won the award of "Provincial Journalist of the year" for the second time in the last three years. Obtaining an agreement for proper productivity and the full use of colour facilities is now

I am delighted to report that the optimism which I expressed last year for this year's profit from News Shops was well founded. A useful contribution has been made by this subsidiary and I hope that the number of shops it owns will increase so that profitability may continue to rise.

Local Radio Investment Two of the radio stations in which the Company has an interest-Metro Radio (Tyne and Wear) and Radio Tees (Teesside) have bogun to produce small profits, and the third, Radle Victory (Portsmouth) is moving towards profitability. I hope, therefore, the Company will soon receive some return on its investments.

Developments in management

The Company is strengthening its Board and management by recruiting a specialist lu ludustrial relations and much attention has recently been paid to this subject generally. A management development programme including concentration on training has been started. The Board has established local management delegated to them greater authority than had hitherto been Management consultants and the conferred locally. Management consultants and the Industrial Society have helped to advise on many aspects

Circulation Growth

The Company is increasingly using market research in order to improve its sale of newspapers and advertising space. Such research, for example, has shown that readers of the Echo. Sunderland, have a higher degree of trust in its advertisements than in those of any other mass com-munication, fueritably there have been increases in the prices of almost all the Company's newspapers and in advertising rates: these have been accompanied by heavy promotion campaigns which, together with an inspresement in the content and the design of most of the newspapers. has resulted in buoyant circulation. A major sim now is to regain our previous level of household coverage—that is to say the proportion of households in each circulation area taking the Company's evening newspapers. Achieving this target would mean that, with the population growth in our three areas, a significant increase in circulation would

Advertising Volume Continued Increase

The volume of advertising in each of the Cempany's evening newspapers continues to rise: I am more confident that advertisers are willing to pay endanced rates for provincial newspaper space than that readers are prepared to pay frequently rising cover prices. Each of the evening newspapers is now selling for slightly less than many others in the country: advertising rates have been increased by as much as was thought reasonable. Of course, optimum use of modern technology would help stabilize both cover prices and advertising rates.

Apart from the exceptions already mentioned, all the Company's staff have worked enthusiastically towards the company's staff have worked enthusiastically lowards the goal of providing the public with the best possible service and I thank them warmly for this. Progress at The News Centre has been particularly good and I believe that the content and colourful production of the Company's newspapers there is now probably as good as anywhere in the world—as is the printing of other publications for an increasing number of outside customers. This immodesty may be justified by the number of national awards for newspaper design, printing and content, which have been

in September, Mr. A. D. W. Hoskyns-Abrah. I left the Board and I thank him for the service he gave to the Company and wish him well in the new work he has

# William Pickles

The Annual General Meeting of the Company was held in Manchester yesterday. The following are extracts from the statement by the Chauman, Mr. C. Harold Buckley, submitted to the

1977 must rate as a disappointing year for your Company, particularly after the encouraging results given in our interim statement. The figures for the year to 31 st December, 1977 show turnover at £22.925,490 against £21,218,089 in the previous year, and Group profit before taxation fell by £59,056 to £817,082 Your Directors decided, in view of these figures, to recommend the same linal dividend. 0.396p per share, as paid in 1977.

The downturn in sales in the last quarter of 1977 had an adverse affect on Group profits in view of the fact that a large percentage of your Company's turnover is manufactured in Britain, and our margins were constantly under pressure due to the intense competition from low cost imports manufactured in the Far East and elsewhere. .

The policy of rationalisation commenced in 1976 is still being vigorously pursued, and I believe the benefits will become apparent when there is any real upturn in the British economy.

I would be less than honest, if I intimated that 1978 had opened up well. The retail trade, by and large, is not buoyant and the April Budget has done singularly little to give our economy the shot in the arm it so badly needs. I am, however, very optimistic and confident about the future of your Group. It is soundly based and the Subsidiary Companies are well diversified in garments for men, women and children. household textiles, soft furnishing fabrics. sportswear, upholstery labrics and neckties.

The trade names, including Banner, Sparva and Uwin, enjoy a high reputation on the High Streets of Britain, and in many overseas markets. Changes have been effected in the Senior Management of certain Companies, and these changes augur well for the future.

# JOHN BRIGHT GROUP

Industrial recession affects results

The 55th Annual General Meeting of The John Bright Group Limited will be held in London on July 19, 1978. The following is a summary of the circulated Statement of the Chairman, Mr. I. M. L. D. Forde, for the year ended April 1,

Trading conditions were affected by a sharp fall in the price of cotton which forced us to write down the value of our raw cotton stocks and resulted in a stock loss of £271,000. Also demand for tyre cord deteriorated to such an extent that we were no longer justified in maintaining production at Preston. We therefore decided to close down the whole of our operation there. The net cost of this closure amounting to over £98,000 has been charged in full against this year's

Although turnever was little changed net profits after tax (but before the closure cost) have shown a sharp fall to £355,047 as against £600,471 a year ago. In view, however, of the exceptional nature of the two losses and the strong financial position of the Group, your Board has decided to recommend a Final Dividend payment on the Ordinary Stock at 1.47p per Ordinary Stock Unit maintaining the total dividend at 2.42p

Demand for the products of the Industrial Textiles Division became increasingly affected by the world-wide recession in industrial activity. Sales fell sharply and pressure on prices both from overseas and home competition became severe. Our Spinning Division was similarly affected. Under these conditions much of this business became unprofitable but by availing ourselves of the Temporary Employment Subsidy we were able to accept such orders and thus maintain in employment a greater number of people than would otherwise have been possible.

In view of the reduced level of activity the opportunity has been taken to press forward with the modernisation programme. The new weaving shed has now been completed and new machinery is at present being installed.

In a market which has been far from buoyant, our sales of carpet yarn have been maintained at a satisfactory level and plans are well advanced to increase our productive capacity

The volume of our tyre cord sales was maintained by obtaining increased business for export which carries a lower profit margin. The general swing to radial tyres has caused a world decline in the demand for textile reinforcement used in tyres but our tyre cord production unit in Rochdale is one of the most modern in Europe and it should be possible to retain this unit on a profitable level of production.

There is no clear evidence as yet of a sustained recovery in demand for our products. The timing of this is still unpredictable, but I am confident that the Company with its modernised capacity should be in a strong position to reap the benefit when it comes.

# THE UNION STEEL CORPORATION (OF SOUTH AFRICA) LIMITED

(Incorporated in the Republic of South Africa)

At the sixty-sixth ordinary general meeting of shareholders of the Corporation held on 20th June, 1978, the following salient points were highlighted by the Chairman,

GROUP PROFITS TO DATE.

Group unaudited profit after tax for the 4 months ended april 30th amounts to R1 351 000. The profit for the corresponding period the previous year was R126 000. This represents an increase in group profit of R1 225 000. This increase is mainly attributed to higher profits in the steel division whilst ALCOR. Veidmaster, copper and castings performed adversely. A further decline in demand for aluminium conductor from Esconi was experienced which resulted in a 70 per cent drop in and curtailment of working bours were inevitable.

Recessionary conditions also affected the market for copper and castings and a pronounced reduction in demand for these products was experienced during the last 6 months. The results of these divisions for the first 4 months of the year are lower in comparison with the corresponding period the previous year.

Special and mild steels realised a profit for the period under review and market conditions indicate a revival for the types of steel products which USCO manufactures. Stock levels of steel merchants were kept abnormally low due to the recessionary situation and the replenishment of stocks also contributed towards the better demand

which was experienced. Despatches of the product groups were 14 per cent higher than the corresponding period the previous year. Due to the sharp increase in demand for steel products manufactured by the Corporation, production units which were closed down during 1976/77 due to recessionary conditions, were put into operation and working hours extended. Further cost saving measures remain under the spotlight and will be extended where

MARKET CONDITIONS AND PROGNOSIS

(a) Mild and Special Steels The mild steel market remains weak and is traditionally highly competitive. The mild steel market remains weak and is traditionally highly competitive. The market for special steels however, is favourably influenced by the increased gold price, the reasonably stable motor industry and general stock build-up. The demand for forgings is satisfactory but activities in the heavy engineering sector are still very low and the demand for carbon forgings is poor. A revival in the agricultural sector is still absent and the demand for agricultural steels remains low.

remains low.

During 1978 the Corporation will commence with the production of certain tool and high speed steels, products which to date have not been manufactured in South Africa, and the demand appears to be very promising. The general expectations are that sales of steel products will be satisfactory during 1978 and that this section will maintain its profit position.

Castings
The decrease in iron ore mining activities is adversely influencing the demand for castings. Infiltration by competitors in the Corporation's traditional markets is increasing as a result of the commissioning of new plants resulting in additional production capacity in South Africa.

A policy of diversification and penetration into other established casting markets is essential to ensure an acceptable utilization of the available production capacity.

capacity. No drastic recovery of market conditions for castings is envisaged during 1978. No significant signs of a market improvement for copper cables, the biggest consumer of electrolytic copper, is noticeable. The demand for copper from the electrical machinery sector has reduced considerably and with limited expenditure by the authorities, the market condition for copper can be considered the weakest in the present recession.

In spite of indications of a slight improvement in the economy, consumption of copper is consumer orientated and only a small portion of the Corporation's product range will benefit favourably as a result of a higher demand from the motor industry and domestic electrical appliance industry.

It is expected that market conditions for copper will remain depressed during 1978 but that this section will realise a profit.

(d) Veldmaster

Veldmaster is still operating at a loss after the first 4 months of 1978. The

Veldmaster is still operating at a loss after the first 4 months of 1978. The

position is similar to that of the corresponding period the previous year. It is

position is similar to that of the corresponding period the previous year. It is

expected that Veldmaster and adecline in the export market as a result of the general expected that veidmaster will again close the year with a loss. This situation is mainly attributed to a decline in the export market as a result of the general economic slump. Certain steps are being taken relative to marketing and pricing of Veidmaster products which, it is expected, will have a favourable influence on Veldmaster performance in 1979.

General No appreciable recovery in the steel market conditions can be expected before

No appreciable recovery in the steel market conditions can be expected before No appreciable recovery in the steel market conditions can be expected before 1979, mainly for two reasons. The first being the American balance of payment problems and the second is attributed to the lack of real growth rate of the E.C. countries which will not materialise as a result of price cutting, keen competition and limitations by governments on outside competition. Competition and limitations by governments on outside competition. As far as South Africa is concerned the steel industry is basically in an unhealthy attained to results for the first four months were a pleasant in special steels and the results for the first four months were a pleasant in special steels and the results for the first four months were a pleasant conditions in the so called mild steel market conditions in the so called mild steel market. Conditions in the so called mild steel market conditions in the so called mild steel market. Conditions is less satisfactory and can be attributed to cost increases which, divisions is less satisfactory and can be attributed to cost increases which, despite the recessionary conditions of the past 4 years, still continue. Contrary to other economists I foresee no improvement in the present inflation Contrary to other economists I foresee no improvement in the present inflation rate and I predict a consumer inflation rate of 10 per cent in 1978 and an even rate and I predict a consumer inflation is based on world pressure on South higher rate for costs. This prediction is based on world pressure on South higher rate for costs. This prediction is based on world pressure on South higher rate for costs. This prediction is based on world pressure on South higher rate for costs. This prediction is based on world pressure on South higher rate for costs. This prediction is based on world pressure on South higher rate for costs. This prediction is based on world pressure on South higher rate for costs. which is outside an proportion in relation to the steel industry is thus burdened with unique cost factors which are to a

great extent not within their control.

USCO management deserves credit for the manner in which they succeeded in curtailing costs and rationalising activities.

Everything possible is being done to improve USCO's position and to increase

ils profitability. M. D. Marais Chairman of the Board

# **GKN/Sheffield** Twist link

GKN Distributors and The Sheffild Twist Drill and Steel Company have formed a joint company for the distribution of cutting tools, socket screws, hand tools and general engineers equipment to the engineering distributor.

This company will be known

This company will be known as Dormer Distribution (Tools) and will sell exclusively to engineering merchants and distri-butors. It will carry a full range of Dormer cutting tools, GKN socket screws and complementary ranges of engineering tools.

# Progress by **Percy Bilton**

At the AGM of Percy Bilton, the chairman said that the private housing division was now achieving its targeted profitability after substantial reorganisation. Contract housing was under control and would no longer be a drain on the resources of the group. Meanwhile, cash had been reduced to make investments "which will secure significant future growth in your group's property portfolio."

# Your place in the big build up

"The success of our first assault, gentlemen, is now overwhelmingly clear.

"200,000 sq.ft. of warehousing and light industrial premises in the superb, new Eurolink complex at Sittingbourne, Kent have now been occupied.

"Heartiest congratulations! "Your next task is therefore obvious: immediately occupy the remaining limited number of units available from 5,000 sq.ft. up to 30,000 sq.ft. Your orders are to capture the next 100,000 sqft as it becomes available during the next 12 months.

"Once established, you can expand at will across 20 acres of planned future development.

"I need not remind you of the vital strategic position of the site. Eurolink is minutes from the M2 motorway, 55 miles from London, 18 miles from Dover, and within easy striking distance of the roll-on/roll-off facilities at Sheerness.

"Movement of transport and supplies is supremely easy due to the site's size and parking facilities. Eaves of all buildings are 20 ft high.

"And local gransport services and amenities will suit your troops down to the ground." "Gentlemen, Eurolink and success is at your feet." For further information contact HQ below

Jardine **Industries** losses widening

By Ron Richardson

HONG KONG, June 26 INDUSTRIES—in which Jardine, Matheson and Co. proposes to acquire the 16 per cent of the equity it does not already own-made a consolidated operating loss of HK\$7.7m (U.S.\$1.7m) in the first four months of 1978. This represents a worsening of the trend of the past two years which saw an operating profit of HKS12.59m for the year to December 1976 turn into a loss of HK\$656,000 last year.

tries' chairman, Mr. David Newbigging, points out that many of the group's activities are seasonal, with the second half of the sear being the more important.—However, he says, the results for the first four months of this year compare unfavourably with the year earlier figures.

He warns that the reported HKS7.7m loss tame before

making certain provisions and extraordinary charges. "In addition it has now become apparent that provisions will have to be made for the writedown of stock and for warranty costs," he says, ardine. Matheson is offering HK34 in cash for each of the

HR34 in cash for each of the 4.76m Jardine Industries shares it does not own. The scheme of arrangement in-volved, to become effective, must be approved by holders of at least 75 per cent of the outside shares. Subject to the passage of a solution at an extraordinary general meeting on July 21, and to obtaining court approval the scheme will become effective on August 1.

is reported at the time of the 1977 annual Export Jardine Industries troubles stem mainly from losses incurred by its Concept 2000 group subsidiaries, which moved into the manufacture of radios. television games and other consumer electronics for sale in the U.S.

# Currency, Money and Gold Markets

# \$ steadies in quiet trading

Trading in yesterday's foreign having stood at 612 in the morn-exchange market was at a ing and 61.3 at noon, generally low level and attention TOKYO—The U.S. dollar con-

Sterling remained on the sidelines and trading took place
within a very narrow range
against the dollar at \$1.8450\$1.8505. The pound opened at
\$1.8490-1.8495 and had showed
very little movement at the close
to \$1.8490-1.8500, a rise of just
5 points on Friday's close. On
Bank of England figures, the
pound's trade-weighted index L411.78 and the Swiss franc to
eased alightly to 61.8 from 61.4, L459.01 against L458.31.

generally low level and attention was once again focused on the U.S. dollar/yen performance. The dollar may have received some support through Japanese banks in London and it finished at around its best levels of the day. This was no doubt helped by a certain amount of buying interest in New York although this in turn may have represented further official intervention. In fact the dollar looked slightly softer overall although its trade weighted average depreciation, as calculated by Morgan Guaranty

Samp Mayor Generally

18 and 61.3 at noon.

TOKYO—The U.S. dollar continuing the weaker trend in European markets on Friday it closed at Y206.25, compared with Y209.525 previously, in very nervous and heavy trading. After to a record low of Y204.80 which prompted some central bank intervention. However, this was soon stopped after further speculative buying of yen nullified any stabilising effect attempted by the bank, on such a scale. The dollar may have been helped later in the day by the possibility of an imminent rise in U.S. interest rates. Turnover in the spot rates. Turnover in the spot market remained heavy at \$634m and about \$783m in combined forward and swap trading.

FRANKFURT—The dollar was fixed at DM 2.0753 which was higher than levels attained in early trading. The U.S. currency rose gradually in generally quiet trading in what was seen as a counter reaction to its recent losses. However, market senti-ment seemed to point towards the dollar resuming its downward trend against the yen throughout the rest of this week. Trading was also quiet ahead of West German trade figures which may be announced today or tomorrow PARIS-In nervous trading, the of New York on noon rates, remained unchanged at 6.8 per levels against the franc with only a moderate volume of business. The U.S. currency may also have lacked direction ahead of FFr 4.5560 from FFr 4.5620 on U.S. trade figures for May, due today. The Japanese yen continued to improve to Y205.32; from Y2071, having seen Y205.10 at one point.

Elsewhere, the dollar fell to Elsewhere, the dollar fell to SwFr 1.8645 against the Swiss franc, from SwFr 1.8650, while the West German mark eased fractionally to DM 2.0763 against the dollar but lost ground to the yen and other major dollar was steady at its lower levels against the franc with only

Sterling remained on the side to the yen and other

# Great personal achievement has a lot in common with merchant banking at its best.

experts tend to rely on a merchant

For the ultimate in financial advice

BHF-BANK traces its proud history to the mid-nineteenth century when its founders were among the most influential merchant bankers of their time: helping to build whole industries, from railways and steel companies to mining and exploration, acting as private clearing houses, opening up new markets in the far corners of the world and providing sound advice on investment opportunities.

BHF-BANK serves nine out of ten top German concerns and its international corporate banking experts advise multinational companies

around the world. It is active in most decisive financial centers, with own branches or subsidiaries in New York, Zurich, Luxembourg and the Cayman Islands as well as offices in many other

strategic locations around the globe.

Although today's available financial instruments are more sophisticated, the basic values of BHF-BANK remain constant: integrity, loyalty and personal responsibility with a flair for financial creativity.

For the unrivalled financial expertise of a management with personal liability, rely on a merchant banker. BHF-BANK.

to Fl 37.4. Bijenkorf, Middenstandsbank and Fokker were among the few higher issues.

GERMANY — Prices eased slightly on a general lack of interest, although dealers noted no specific reasons for the sluggish trading.

Karstadt gave way DM 7 to 313 but Demag firmed DM 1 to 138.

State Loaus were again weak, with losses up to 40 pfennigs.

The Regulating Authorities bought stock totalling DM 96.3m, compared with DM 80.7m on

State Loans were steady.

# FARMING AND RAW MATERIALS

# EEC in talks for world pact on dairy trade

BY MARGARET VAN HATTEM

PROPOSALS FOR an inter Irish exports. PROPOSALS FOR an interinitial framework agreement However, Mr. Gundelach has passing through the Council of said any concessions on these distinctions of New Zealand reciprocal. This is generally irritated by the increasingly understood to mean that the New Successful New Zealand publicity Zealanders will get their quotas campaign within the UK in

here tomorrow.

Zealanders will get their quotas campaign within the UK in Zealand Deputy Prime Minister, access to the U.S. market for its will be holding discussions with own dairy products.

Leading to mean that the New Succession New Leading public here in the EEC can get increased recent months which it believes has built up public hostility to the proposed regime.

Leading to mean that the New Succession New Leading public hostility to the proposed regime. will be holding discussions with own dairy products.

Mr. Fina Gundelach, the EEC However, lamb and mutton,

tor, in Geneva today,

The framework agreement would include general provisions for the exchange of information on production and marketing of fairy products between the EEC. New Zealand, the U.S., and the control of the commission that its UK exports is limited in the proposed regime for sheepmeat short term, and in the long term will not in any way affect access could increase export possition. New Zealand, they added. New Zealand, the U.S., and possibly other countries.

It could also include an agreement on-milk-powder-prices and the bilateral agreement on

Opposition to the latter is expected from Ireland, which fears that reopening the UK market to New Zealand cheddar Agricultural Produce last year \$43m—bwice as much as in 1976 may cut Irish cheese exports to Britain, Mr. Jim Gibbons, the Irish Agriculture Minister, made this clear during last week's farm council in Luxembourg.

BY OUR COMMODITED 32014

THE INTERVENTION Board for in surplus dairy produce. Almost \$43m—bwice as much as in 1976—was spent to buy unwanted and European Community money on surplus butter also increased by the same proportion to \$20.5m.

It also collected £71.1m in There was less need for sup-Opposition to the latter is

this clear during last week's tarm council in Luxembourg.

# CHIPBOARD MARKET

# Imports squeeze UK mills

BY A SPECIAL CORRESPONDENT

In the first three months of 1978 placings were 5 per cent

sensitive areas. The Government excess of demand for the past The Finnish producers were the majority in the constituency at four years.

The Finnish producers were the Over the years many furniment by the constituency at four years.

The Finnish producers were the Over the years many furniment by the constituency at four years.

British egg production appears to have stopped. In April placings of layer chicks in egg batteries fell I per cent below the figure

BRITISH CHIPBOARD manufac country has always been vulner. British mills hoped that their of their capacity (about 40 per turers have warned the Govern-able to the peaks and troughs in trade would as least stabilise or cent of our total requirements) ment that if imports continue to the demand from its two main even improve, but this has not and only import the balance. This fell I per cent below the figure take their present share of the customer industries—construct happened and the April figures ignores entirely the complexities.

UK market some milks will be tion and furniture manufacture show a continuing decline and an of quality, specification and serforced to close. The loss of jobs—and is really viable only at increase in supplies from Finland. vice.

Egg prices are low and some farmers are reported to be losing 12p on every dozen sold. Placings in the EEC as a whole were 2 per cent down between January and the beginning of April following six months when placings were 7 per cent higher than a year earlier. Placings in Belgium fell 4 per cent higher than a year earlier. Placings in Belgium fell 4 per cent, France 5 per cent, and there was a reduction in both Italy and West Germany of 5 per cent. In Holland, however, expansion continued.

Zaire copper

Toduction

KINSHASA, June 28.

more than during the comparable period of 1977. This surge followed increases during the second half of last year averaging 3 per cent above placings in 1976.

Until April, farmers appeared to be ignoring repeated warnings from the Eggs Anthority about overstocking.

Producers are now feeling the impact of their earlier expansion.

Egg prices are low and some

# Rise for Polish stock farmers

THE POLISH authorities have decision will put around 6.5bn would be less susceptible to 130,000 tonnes of concentrate producers in an attempt to boost producers in an attempt to boost farmers' pockets this year and tion costs and smaller price stockpiled before the invasion. Normal concentrate production after a slowdown in recent months. Beef producers by ZL 14.5bn.

The sources said at present stockpiled before the invasion. Normal concentrate production securing production growth.

It also means that the 74 per Moves to raise consumer meat

one of the most important facof the population and the issue has brought factory stoppages and demonstrations twice since

Consumer prices for meat have not been changed since

Consumer prices for meat have not been changed sines 1967.

Feed shortages and rising the production in Poland is in normal meat shops.

The shift of the better-quality grade tea sold at the weekly stage sold per cent more than last two animals and who need large shops leaving the lower-quality price increases to stimulate meat at the old prices will be quality fetched 124p—down 1p—off wet weather at harvest time, it is argued, with care."

The AVERAGE price of quality grade tea sold at the weekly grade tea sold at the weekly shops leaving the lower-quality fell 3p to 132p a kilo. Medium quality fetched 124p—down 1p—and plain grades were unchanged at 80p a kilo.

Larger farms, it is argued, with care."

producers another 9 per cent subsidy paid by the state prices were also revealed today skilled technical personnel were at deliveries and prices are will rise to \$3 per cent. Ludowy. Meat deliveries and prices are will rise to 83 per cent.

Voices in Government circles According to the daily, around

WARSAW, June 26.

Ludowy. have been raised warning about 300,000 tons of better-quality the inflationary effects of such meat out of the total annual a decision and arguing that the amount of 1.6m tons sold to fragmented structure of the Polish consumers will be sold farming system is at the root in "commercial" shops and of the problem rather than low delicatessens where prices are prices.

# Feed companies lose Coffee smugglers hit their EEC lead

BY CHRISTOPHER PARKES

THE BRITISH animal feed manufacturing industry is the Cinderella of the Common Market. Its output and labour records compare hadly with those of companies elsewhere in the EEC, a market survey published by Jordan Dataquest

shows. British compounding, bigger than any other EEC country's feed industry in 1970, produc-ing 22 per cent of total EEC output, has now been overtaken by West Germany, France and Holiand.

The survey notes that the number of compounders in Britain is declining. Livestock numbers in the UK are also failing. Wages, on the other hand, have increased "markedly," and staffing levels

Between 1970 and 1976, total production of compound feeds in West Germany, for example, climbed 35 per cent to 13m (onnes a year. This gave West Germany's industry a 20.3 per cent share of total Community

In France, the relative increase was even more startling -up 61 per cent. In Holland, too, production rose 44 per cent to 11.39m tonnes. In the UK, output increased

only 3.2 per cent to 11.35m tonnes, giving Britain's companies 17.6 per cent of overall Common Market production.

The survey points out that part of the loss of ground can be attributed to the technical be attributed to the technical and structural superiority of British feed Industry in

the 1960s.
In spite of the contraction, the number of jobs in the industry has increased from 30,160 in 1973 to 31,100 during

 The International Wheat Conneil has increased its first put this year to between 400m and 410m tonnes, compared with an earlier forecast of 395m to 405m tonnes.

# **Uganda** exports

OUT OF 12,600 tonnes of Arabica for coffee Uganda's exports had Ugands, only 2.600 tormes were previous year. The gross officially exported. "It is presumed that an estimated 10.000 cent, but prices had gone up due tonnes of arabica was smuggled to "unscrupious businessmen and out of figands into naighbouring woman who took advantage of a out of Uganda into neighbourins women who took advantage of a countries," said Brig. Moses All, difficult situation to charge very Uganda's Finance Minister, bigh prices."

In London meanwhile, Mr. reekend. George Ford, chairman of the Uganda's economy recovered International Coffee Organisa-

last year due to the high prices tion, said there may be a return for its coffee exports, said Brig. to a more normal world coffee All. Coffee production in the 1976/1977 crop year, which ended on September 30, increased from 137,000 tonnes to 156,000 tonnes. disasters Of this robusta coffee accounted countries. for 128,000 tonnes.

INTERNATIONAL SUMMER SCHOOL 1978

# Financial Management for the **Non-Financial Executive**

**LONDON JULY 10-21 1978** 

The increasing amount of accounting and financial management needed to run a modern successful business is placing great strains on middle and senior management not trained in accountancy. To meet this problem, the Financial Times and The City University Business School, of London, have arranged a two-week course entitled 'Financial Management for the Non-Financial Executive' to be held in London on July 10-21, 1978.

This course was first held in 1977 and attracted substantial support from Britain and abroad. The suggestions of rutors and course participants in 1977 have been taken fully into account in preparing this year's programme and the sponsors believe its value will have been increased still further.

The course will be headed by a former finance director of a major industrial company and a merchant banker, and the panel of 22 distinguished lecturers are drawn from universities, commerce, accountancy and banking. The participants will be divided into study groups of fifteen people headed by a group leader. The ten days of instruction are broken down into lectures, case studies and various group exercises so that the students take an active part in the programme.

Apart from being a thorough two-week programme of studies the Summer School also offers an authentic insight into the workings of the City of London and provides opportunities for making useful contacts with people and institutions.

The list of distinguished speakers includes:

Mr N. Goodison Chairman, The Stock Exchange Council

Mr A. W. John formerly Finance Director, Unigate Limited

Mr S. R. Harding Director, Hill Samuel & Co Limited Mr R. T. Fox Director, Kleinwort, Benson Limited

Mr R. T. Esam Head of Group Taxation and Corporate Structure Royal Dutch Shell Group of Companies

Mr D. C. Hobson Senior Partner, Coopers & Lybrand

Mr R. S. Napier Group Treasurer, Fisons Limited

Mr R. C. Westmacott Assistant Director, Barclays Merchant Bank Limited

To The Financial Times Limited, Conference Organisation. Bracken House, to Cannon Street. London EC4P 4BY. Tel:01-236 4382. Telex: 27347 FTCONFG. Please send me further details of INTERNATIONAL SUMMER SCHOOL 1978

figure being affected - and

# World's airlines boost operating profits

spread too late to influence the although cheap fares are already being seen as sumulating some growth troffic, it is not yet clear whether they are adding anything to profits.

It is possible that some air-

lines are experiencing "profit-less growth" because the fares-introduced are too low to make on the North Atlantic, for example, where cheap fares became widespread only late last year, the big scheduled airclaiming success.

Preliminary figures issued by

Preliminary figures issued by the International Civil Aviation nical agency of the UN, show their week-old industrial action a similar concession being made the new basic rate, that all the airlines (scheduled yesterda) after winning Govern- in the electrical contracting. The Government Organisation, the aviation techcharter airlines) in its 141 member-countries, carned total the private sector, revenues of \$49bn (more than A recalled deleg-

£26bn) last year. Against this had to be set the Electrical and Plumbing operating expenses of \$46ba Trades Union agreed with their (more than \$25bn), for such union's recommendation to accept items as fuel, oil, wages, salaries an offer of parity from next and landing fees, leaving an September with comparable operating surplus of about \$350 workers in the electrical con-(more than El Shn).

This represented 6 per cent of restriction and the lowest-ever in 1976 and the lowest-ever 1.9 per cent in 1975.

The organisation pointed out. however, that this was only an a week to \$70 a week. operating surplus. It did not take into account such non-operating items as interest on interest of in capital and taxes in various the Government for the second anniversary.
